COMP 307
Principles of Web Development

Mini Assignment 3
Due: October 4, 2016

Using only HTML and CSS construct the following webpage:

Create only this single webpage.

Notice that there a many links: underlined text, bold green text, menu on the right, and links at the end of the web page. These must be functional links. They should point to random internet webpages, but attempt to point to pages that are vaguely under the same theme.

Notice that the writing is not in English, other than the titles. Keep the titles and provide your own random text or use Lorem Ipsum. You can Google for sample Lorem Ipsum text that can be copied and pasted into your webpage.

Your webpage MUST look "identical" to the page above: same colours, fonts, and styles. Try to get it as close as you can to what is presented here.

Make sure the above webpage displays on your browser. Remember, you do not need to install a webpage on the Internet. Using your browser's File Open menu command, you can load an HTML document stored on your disk into the browser to see your handy work.

FOR THE GLORY

The following GLORY challenge if for those of you brave souls who like doing extra work for no grades. However, you can brag to your friends about your programming skills.

Get the above web page working on a XAMP instance installed on your computer.

WHAT TO HAND IN

The HTML page, and a README stating which browser you used.
